

## **Drag and Drop Specs:**

A JavaScript app that allows the user to play four different sets of puzzles. Each set has four puzzle pieces which the user will drag onto the drop zone. The user can alternate between the four sets of puzzles by clicking the thumbnail.

If user drags a puzzle piece into a drop zone that already contains another puzzle, then exit the function.

If thumbnail is clicked to change the puzzle set, then pieces that are currently in the drop zone will be returned back to its original position.
